MIT Center for Transportation and Logistics | MIT CTL

The future rarely moves in predictable, incremental ways. Often seemingly small changes in technology, demographics, regulations, economics, or a myriad of other factors have dramatic and unintended impacts on how companies source, manufacture, distribute and operate in general. These non-linear impacts are very difficult to predict using traditional forecasting …

Navigating COVID-19 impact on transportation and logistics

Full Truckload (FTL) sometimes known as Truckload (TL): 'The entire 53 feet of trailer space is needed to transport freight Less Than Truckload (LTL): This indicates that there is an inadequate amount of freight to fill an entire truck; only part of a trailer is needed to transport freight. LTL shipments are transported on trucks with goods from other shippers, making multiple stops or …

Transportation Liability: Busting - Inbound Logistics

Logistics companies typically use transportation management system software to help meet the demands of transport-related logistics. There are also niche applications, such as yard management systems. Warehousing, or warehouse management, includes such functions as inventory management and order fulfillment. It also involves managing warehouse …
